CognitivZen
Future Ready, Together.

PRODUCT ENGINEERING
AI / CLOUD / DATA / INTEGRATIONS

OUTSOURCED PRODUCT DEVELOPMENT

Build next-gen enterprise products.

We design, build and scale enterprise software, connect it to the systems you already run, and put AI to work inside it.

**FROM IDEATION TO GTM.
AND EVERY RELEASE AFTER.**

Software companies and enterprise IT teams bring us in at any stage: a first prototype, a platform rebuild or the next major release.

ISO 27001 CERTIFIED

AICPA SOC

2010	200+	US + India
Building enterprise products since	Enterprise products delivered	Offices in San Jose and Hyderabad

COGNITIVZEN.COM

02 / ENGINEERING SERVICES

One team. From idea to GA.

- **01 AI & intelligent automation.** Put AI to work on real business problems with machine learning, assistants and agents.
- **02 Product & platform engineering.** Enterprise products and SaaS platforms across verticals, built to scale.
- **03 Legacy modernization.** Re-architect, re-platform or move legacy applications to the cloud, step by step and without disrupting daily operations.
- **04 Integration technologies.** Connect ERP, CRM and SaaS systems through APIs, iPaaS, event streaming and data sync. Platforms include Boomi, Workato and MuleSoft.
- **05 Cloud, DevOps & SRE.** Cloud platforms, automated delivery, containers, monitoring and support.
- **06 Data engineering & analytics.** Ingestion, pipelines and modeling that give analytics and AI data you can trust.
- **07 Quality & security.** Automate and speed up functional, regression and performance testing, with security controls and reporting built into every release.
- **08 Experience & interface design.** User research, UX and UI design, frontend development and accessibility.

WHY TEAMS WORK WITH US

- **Enterprise products.** Built and released for general availability, scale and long-term support.
- **Full-lifecycle ownership.** Discovery to managed operations under one accountable partner.
- **Enterprise integration depth.** Built to fit the systems, data and workflows you already run.
- **Quality & security by design.** Test automation and security controls from the first sprint.
- **Onshore alignment, offshore scale.** US–India time zones keep work moving around the clock.
- **Speed to market.** Reusable accelerators and short release cycles.

A CLEAR PATH THROUGH DELIVERY

01 Align
Goals, scope and success measures

02 Design
Prototype and test with users

03 Build
Ship in tested stages

04 Scale
Run, monitor and improve

Start with the work. Then bring in AI.

Where does your team lose time? We help you pick a useful starting point and build around it.

01
Predict & plan
Machine learning for forecasts and recommendations, like predicting inventory shortfalls before they disrupt operations.

02
Find & understand
Assistants that search and summarize knowledge across disparate repositories.

03
Act & automate
AI agents that work inside your workflows, with human review built in.

Our approach covers: observability, privacy, guardrails, LLM token economics, AI governance, security and audit trails.

OUR AI ACCELERATORS

Ready to deploy on your data

DataZen
CONVERSATIONAL AI ANALYTICS

Ask. Get answers. Instantly. Converse with multiple data sources in plain English, no SQL needed, and get charts and insights in seconds. Follow-ups keep context; each user sees only the data their role allows.

Multi-source · Governed metrics · Role-based access · Pinned dashboards

DataZen Lite: the same experience on your ticket data, for lean teams.

DocuZen
AI DOCUMENT INTELLIGENCE

Read less. Know more. DocuZen reads long PDFs, Word, Excel, PowerPoint and scanned files in seconds and gives you what matters, citing the exact page, slide or cell. If your documents don't hold the answer, it tells you plainly rather than making one up.

Multimodal · Cited answers · Version-aware · Permission-filtered

QAZen
AI AUTOMATED TESTING FRAMEWORK

From BRD to test cases in minutes. QAZen reads your BRDs and PRDs, writes complete test cases and automated scripts for web, API, mobile apps and databases, runs them and documents every step, with QA sign-off at key stages.

BRD to tests · HITL · Failure triage · Release readiness

INDUSTRIES WE WORK IN

- Automotive Aftermarket
- Cybersecurity
- Enterprise Technology
- EdTech
- FinTech
- Healthcare
- Insurance
- Life Sciences
- Logistics
- Supply Chain
- Public Sector
- Telecom
- Workforce Technology

04 / EXPERIENCE & CONNECTIONS

Built on real relationships.

Trusted by automotive, technology, financial-services and public-sector organizations.

CLIENTS

AFTERMARKET AUTO PARTS ALLIANCE · Parkour sc · DeltaTrak · Microsoft · Indian Cyber Crime Coordination Centre · HITACHI · EXO · HS GOVTECH · servicenow · Abbott · edelweiss life insurance · CONSTELLATION PAYMENTS

RESULTS WE'VE DELIVERED

1M+
part searches a day
Automotive aftermarket

80%
reduction in spoilage
Cold-chain logistics

98%
tracking accuracy
Cold-chain logistics

87%
faster delay detection
Cold-chain logistics

TECHNOLOGY PARTNERSHIPS

snowflake · databricks · Liferay · aws · Microsoft Azure · ANTHROP\C · OpenAI
